## WHAT'S NEW WITH THOMSON REUTERS PRIVATE EQUITY

### REAL ESTATE FUND PERFORMANCE

Introducing the **Partners Group Thomson Reuters Private Real Estate Index**. A unique dataset in the market, this index provides a comprehensive summary of fund performance benchmarks for real estate investment performance measurement. The index currently contains 278 funds and is compiled on a semi-annual basis.

The new **Fund Performance Real Estate Screener** includes the ability to search by criteria like Location, Fund Stage (including Opportunistic, Value Add and Core), Fund Vintage Year, Quartile Position, Fund Size, IRR Range, Real Estate Geographic Preference, Fund Sequence, and Liquidated Funds.

This data is available as part of the ThomsonONE.com Private Equity module.

Thomson Reuters set the standard more than 20 years ago by being the first to publish performance benchmarks for venture capital investment. These benchmarks are used worldwide by General Partners, Institutional Investors, Pension Consultants and other financial institutions. While in recent years other data providers have purported to offer benchmarking data, Thomson Reuters is the only independent, cash flow-based performance model in the market. Through deep, unbiased relationships within the industry, we capture net cash flows to and from Limited Partners on the dates the transactions occur, providing unparalleled accuracy and objectiveness in our pooled data. In short, a subscription to ThomsonONE.com and our Private Equity module ensures you have access to the industry standard for private capital performance.
